PROFESSIONAL SUMMARY

Full-stack software engineer and applied statistician with hands-on experience building production-grade web applications, REST APIs, and data analytics pipelines. Proficient across the full MERN stack (MongoDB, Express, React, Node.js) as well as Python, TypeScript, Next.js, and cloud infrastructure. Combines strong engineering fundamentals with a Bachelor of Technology in Applied Statistics, bringing quantitative rigour to feature design, data modelling, and performance optimisation. Eager to contribute to a fast-moving engineering team while deepening practical experience across the stack.

EXPERIENCE

Freelance Web Developer

01/2025 – Present

Freelance

Client Projects

- Built and delivered full-stack web applications for clients using React, TypeScript, Next.js, Node.js, and MongoDB, handling everything from UI design to backend API development and deployment.
- Developed responsive, accessible frontends with Tailwind CSS, integrating REST APIs and third-party services for dynamic content and real-time features.
- Managed DNS configuration, Vercel and Netlify deployments, and CI/CD pipelines to ship and maintain production websites.
- Collaborated directly with clients to gather requirements, iterate on designs, and deliver projects on time with thorough documentation.

Finance Officer (Intern)

03/2024 – 08/2024

Uasin Gishu County Government

- Managed and analysed large structured financial datasets, performing data validation, reconciliation, and quality assurance to support compliance reporting.
- Produced management reports requiring precise data aggregation and clear presentation of financial trends to senior decision-makers.

EDUCATION

Bachelor of Technology in Applied Statistics

01/2021 – 11/2024

Technical University of Kenya

- Coursework: statistical modelling, econometrics, database systems, quantitative research, probability theory, and financial data analysis.
- Dissertation: Designed a full quantitative research and data pipeline (N=267) covering data cleaning, regression modelling, factor analysis, and structured reporting in SPSS and Stata.

TECHNICAL SKILLS

Languages

Python, JavaScript (ES6+), TypeScript, SQL, R, Java

Backend & APIs

Node.js, Express.js, REST APIs, FastAPI, Flask

Cloud & DevOps

AWS (Lambda, API Gateway, S3, Step Functions, CDK v2), GitHub Actions, Vercel, Netlify

AI Integration

OpenAI API, Anthropic API, LLM-powered feature development

Frontend

React.js, Next.js, Tailwind CSS, HTML5, CSS3

Databases

MongoDB, PostgreSQL, MySQL, DynamoDB

Data & Analytics

pandas, NumPy, scikit-learn, Tableau, SPSS, Stata, matplotlib

Tools

Git, GitHub, VS Code, Postman, Linux CLI, Jest, Figma

CERTIFICATIONS & TRAINING

Professional Foundations & Cybersecurity

ALX Africa

- Network security, secure system design, and structured analytical thinking applicable to cloud-native application infrastructure.

MERN Full-Stack Development

Power Learn Project Africa

- Full-stack curriculum covering React, Node.js, Express, MongoDB, REST APIs, Git, and CI/CD deployment pipelines, with SDG-focused capstone projects.

LANGUAGES

English

Professional Proficiency

Swahili

Native

PROJECTS

Kazify

2024 – 2024

Next.js, React, TypeScript, Tailwind CSS, Vercel

- Built a full-stack web platform with server-side rendering achieving sub-2-second page load times, using Next.js App Router and REST API integration for dynamic content.
- Implemented a fully typed TypeScript codebase with reusable component architecture, ensuring maintainability and type safety across the frontend.
- Deployed to Vercel with a CI/CD pipeline, managing environment configuration and production performance optimisation.

NURU: Rural Clean Energy Platform

2024 – 2024

React, TypeScript, Figma

- Served as Designer and Frontend Developer on a four-person team building a mobile platform concept connecting rural Kenyan households to clean energy solutions.
- Designed Figma wireframes across five core screens and developed a branded pitch deck for stakeholder presentations.

Statistical Research Platform

2024 – 2024

Python, SPSS, Stata

- Built an end-to-end quantitative data pipeline for a study of N=267 participants, covering data ingestion, cleaning, variable construction, regression modelling, and factor analysis.
- Applied PCA, Cronbach's alpha reliability testing, and sequential regression across multiple domains, producing structured academic reports.

Meridian Consulting Group Website

2024 – 2024

React, TypeScript, Tailwind CSS, Vercel, Hostinger

- Designed and deployed a professional consulting website with custom DNS configuration via Hostinger and Vercel hosting, resolving a nameserver conflict during go-live.
- Delivered a clean, responsive multi-page site with client review cycles and iterative UI refinements.
